## PROFILE

Frontend Developer builds the user-facing part of websites and applications using HTML, CSS, JavaScript and Bootstrap . They focus on responsive design, performance, and user experience by working with libraries and framework like React, Redux, or Angular.

## WORK EXPERIENCE

### Online Water Supplyment Aucus

JULY-2025

- Online Water Supply Management System enables customers to request water delivery services online and allows admins to manage these requests efficiently. The system streamlines order placement, tracking, and delivery management for water supply companies.
- **Add Tool and Technologies:** - HTML, CSS, Bootstrap 5, JavaScript, ReactJS, Tailwind, Redux.

### Online Shopping MultiShop

MARCH-2025

- Designed and developed a responsive frontend for a MultiShop e-commerce platform using ReactJS, featuring product browsing, cart management, and user authentication interfaces. The UI ensures a seamless shopping experience with category-wise product listings and a clean, mobile-friendly layout.
- **Add Tool and Technologies:** - HTML, CSS, Bootstrap 5, JavaScript, ReactJS, Tailwind, Redux.

### Shree Padmashali Social Trust

JUNE-2020

- This project is developed to manage and provide various services to the members of a Trust (Samaj). It includes modules like Matrimonial Services, Credit Society Services, Donation Services for education and events, and Loan Management. The system aims to streamline service requests and maintain records efficiently for all trust members.
- **Add Tool and Technologies:** - HTML, CSS, Bootstrap, JavaScript, PHP, MYSQL .
